

Title: the truth behind skinwalkers

Logo:

Introduction:

This organization shows the truth behind the skinwalkers who roam the earth. Many believe that they are fake or just a myth to tell kids to get scared, but they do exist and it's something we have to keep an eye out for. Skinwalkers are old creatures that were created by Navajo people (which is a Native American tribe from southwest United States) Which are said to be an evil spirit. Skinwalkers could be some sort of ghost, demon or Alien but It is pretty clear that they are witches who used to be human but sacrificed themselves or something else to become a shapeshifter. Skinwalkers can take many different forms like a human or animal, which makes it hard to tell if they are real or not, and it's important to know if they are a skinwalker before you start attacking them or running. Skinwalker hide and stay In certain places which Is why Humans don't see them often. It is important to know how to identify one and what to do when you find one.

About us:

This Organization was founded in 1985 by Eduardo Gutierrez. Eduardo Gutierrez was born in Southern Texas but grew up and lived all his life in Arizona. In his twenties Eduardo worked as a cameraman for a news channel. One day when he was walking through the forest on a hike he came across a skinwalker in the distance. He took a picture and ran to his car. Later he went to the news station he worked at to get his picture on the news. He started to promote his new organization called "The Skinwalker Awareness Club" where he would learn new things about skinwalkers and hear people's skinwalker experiences and teach others about them. By 1996 the organization grew a lot and became very popular in the southern states. The organization began to study skinwalkers more seriously to learn how to avoid them and what to do when encountering one. Now over 4,000 people have joined this organization to learn more about these paranormal creatures.

Memorial:

This memorial is to share the life and accomplishments of Eduardo Gutierrez who died in 2013 wanting to learn more about these creatures so that he could help others. Eduardo had a wife and two kids who loved and supported him very much. Eduardo was found dead on the edge of a small forest in Arizona. It was unknown what killed him, he has had a history of having heart attacks so that's what they assumed it was. Now Eduardo's wife Susan helps run this organization so that she can do and teach everything her husband wanted to.

Research:

- Skinwalkers are witches that use dark magic to shapeshift into any form that they see like an animal or another living thing.

- They are evil spirits who that the body of a human and they have a deformed body and a monster head, they can take the body of any supernatural animal.
- In Navajo culture they believed that skinwalkers would do anything to stay alive whether it was to kill someone/something, steal or lie.
- The only way to get rid of a skinwalker is to bury the original body and wear a medicine pouch so that the evil spirit does not possess you next.
